- 5 - Strongly Agree

**For Students**

- 1. Accessing grades, balances, and schedules through the current/manual process takes too much time.
- 2. I often experience difficulties requesting documents (grade slips) from the registrar.
- 3. Having a single online portal would make it easier for me to access academic information anytime.
- 4. An online portal will help me avoid long lines and delays when processing school requirements.
- 5. Viewing scholarship and tuition balances online would make financial monitoring more convenient.
- 6. I believe the student portal would reduce errors compared to manual transactions.
- 7. Overall, I think a web-based student portal will improve my academic experience.

**For Professors**

- 1. Encoding and updating student grades manually take a lot of time and effort.
- 2. The lack of an online system sometimes causes delays in submitting or checking grades.
- 3. A web-based portal would make it easier to manage the subjects I handle.
- 4. Having a portal would help minimize errors in grade recording and submission.
- 5. The portal would improve communication between professors and registrars.
- 6. The current/manual process of grade handling and schedule monitoring can be stressful.
- 7. Overall, I believe a web-based student portal would improve my workflow.

**For Registrar**

- 1. The manual processing of subjects, schedules, and student records is time-consuming.
- 2. Issuing documents like Transcript of Record often requires repetitive manual work.
- 3. A centralized portal would help organize and update student records more efficiently.
- 4. The portal would reduce errors in subject assignments and schedules.
- 5. Managing student status (scholar) would be easier with an online system.
- 6. The current/manual process causes delays for students and staff.
- 7. Overall, a web-based student portal will improve the registrar's efficiency and service delivery.

**For Admin**

- 1. Managing academic records manually takes too much time and resources.
- 2. Assigning subjects, professors, and schedules is harder without a centralized student portal system.
- 3. An online portal would provide better monitoring of students' academic and financial records.
- 4. The system would help improve transparency in tuition and scholarship information.
- 6. The traditional/manual method is prone to delays and inconsistencies.
- 7. Overall, implementing a web-based student portal will improve academic management in the institution.
